

Shreyas

Full-Stack & AI Developer — Agentic Systems · RAG · Web Engineering

Chennai, India · shreoriginal@gmail.com · shreyas-portfolio-virid.vercel.app · github.com/shreyascode11 · linkedin.com/in/shreyas1102

SUMMARY

Full-stack AI developer focused on bringing models out of research and into production. I build autonomous agentic workflows and RAG pipelines and integrate them into high-performance React / FastAPI products, deployed and kept running on cloud infrastructure (AWS, Vercel, Render). Award-winning project work across AI simulation, civic tech, and knowledge-grounded assistants.

EDUCATION

B.Tech — Computer Science & Engineering (Cloud Computing) Jul 2025 — Jun 2029
SRM Institute of Science & Technology, Kattankulathur, Chennai · **SGPA 9.57 / 10**

EXPERIENCE

- Technical Team Member — Cloud** · SRM Insider Community Jun 2026 — Present
- Deploy and operate the community's production tools on cloud infrastructure, keeping student-facing services live.
- Web Development Member** · SRM Insider Community Apr 2026 — Present
- Build and ship web tools for the community with React, FastAPI and PostgreSQL — from feature design to deployment.

PROJECTS

- The Last CEO — AI business strategy simulator** · team project 2026
★ **Best Project — SRM Insider Community, Jun 2026**
- Business simulator where every quarterly boardroom decision is scored live by a machine-learning prediction engine trained on real AI-adoption data, with every forecast explained factor-by-factor (SHAP).
 - Owned full-stack & data work across a React front end and FastAPI ML backend; live on Vercel + Render with a what-if simulator, dynamic events and 8 endings.
- EcoScan — AI-verified community waste management** · team project 2026
- Real-time civic platform: citizens report waste on a Leaflet map, volunteers claim cleanups, WebSockets broadcast updates instantly; gamified leaderboard and 5-language UI.
 - Two AI vision pipelines (Groq): before/after photo verification of every cleanup, plus Street View cross-checking to catch fraudulent GPS reports.
- Insider-Agent — agentic RAG assistant** · solo, design & build 2026
- Official AI assistant of the SRM Insider Community — answers policy/deadline questions grounded in club manuals via ChromaDB retrieval, eliminating hallucinated answers.
 - LangGraph state-machine agent with multi-turn memory; dual deployment — Groq Llama-3.1 in the cloud or fully offline via Ollama with automatic model fallbacks.
- Personal Portfolio — interactive 3D experience site** · solo 2026
- Hand-written Three.js, GSAP motion and day/night theming in dependency-light vanilla JS; 55 KB initial bundle, screen-reader-safe animations, deployed on Vercel.

ACHIEVEMENTS & CERTIFICATIONS

- Best Project** — SRM Insider Community · Jun 2026
- 2nd Runner-Up** — The Last Commit: Agentic AI Hackathon, Cherry+ Network · SRMIST · Apr 2026
- Top 12 Teams** — Kernel Panic, DevFest On Campus, GDG SRM · Apr 2026
- Python Software Training** — ENDURO · IIT Hyderabad · Oct 2025 (EN251770)

SKILLS

AI / ML	LangChain, LangGraph, RAG, ChromaDB, SHAP, Groq Vision, Ollama
Languages	Python, JavaScript, C, C++, Java
Web	React, FastAPI, Node.js, Three.js, Tailwind CSS, Vite
Cloud & Data	AWS, Vercel, Render, PostgreSQL, WebSockets
Tooling	Git, GitHub, Postman
