

SHREYAS

Full-Stack Developer — React · Next.js · FastAPI · Agentic AI

Chennai, India · shreoriginal@gmail.com · shreyas-portfolio-irid.vercel.app · github.com/shreyascode11 · linkedin.com/in/shreyas1102

SUMMARY

Full-stack developer who ships production web apps end-to-end — React / Next.js front ends, FastAPI and Node.js back ends, and PostgreSQL / Redis data layers — deployed and kept running on cloud infrastructure (AWS, Vercel, Railway). Owns features from design through CI/CD, with a specialty in integrating award-winning agentic AI and RAG pipelines into real products.

EDUCATION

B.Tech — Computer Science & Engineering (Cloud Computing) Jul 2025 — Jun 2029

SRM Institute of Science & Technology, Kattankulathur, Chennai · CGPA 9.4 / 10

EXPERIENCE

Web Development Intern — InAmigos Foundation (NGO) 2026

- Audited the foundation's production website (inamigosfoundation.org.in), surfacing injected SEO spam, broken links, and inconsistent contact data; documented findings with evidence and concrete remediation steps.
- Delivered multiple web builds — portfolio and campaign microsites — owning each from design through deployment.

Technical Team Member — Cloud · SRM Insider Community Jun 2026 — Present

- Deploy and operate the community's production tools on cloud infrastructure, keeping student-facing services live.

Web Development Lead · SRM Insider Community Apr 2026 — Present

- Build and ship web tools with React, FastAPI, and PostgreSQL — from feature design to deployment.

PROJECTS

Aegis — AI agent security platform (MCP) · team project 2026

★ 1st Place — NitroStack × MCP To The Moon Buildathon

- Built a platform that maps an AI agent's connected tools into a capability graph and flags “toxic combinations” (the lethal trifecta) that widen its blast radius — grounded in real, documented AI-security incidents.
- Shipped an MCP server exposing four tools (`connect_tool`, `get_capability_graph`, `detect_attack_paths`, `apply_policy_fix`) over a deterministic graph engine that detects attack paths and applies policy fixes.

The Last CEO — AI business strategy simulator · team project 2026

★ Best Project — SRM Insider Community, Jun 2026

- Owned full-stack and data work across a React front end and FastAPI ML backend; live on Vercel + Render with a what-if simulator, dynamic events, and 8 endings.
- Quarterly boardroom decisions scored live by an ML prediction engine trained on real AI-adoption data, with every forecast explained factor-by-factor (SHAP).

Insider-Agent — agentic RAG assistant · solo 2026

- Official AI assistant of the SRM Insider Community — answers policy/deadline questions grounded in club manuals via ChromaDB retrieval, eliminating hallucinated answers.
- LangGraph state-machine agent with multi-turn memory; dual deployment — Groq Llama-3.1 in the cloud or fully offline via Ollama with automatic model fallbacks.

EcoScan — AI-verified community waste management · team project 2026

- Real-time civic platform (Leaflet map + WebSockets, gamified leaderboard, 5-language UI) with two Groq vision pipelines: before/after cleanup verification and Street View cross-checking to catch fraudulent GPS reports.

Personal Portfolio — interactive 3D experience site · solo 2026

- Hand-written Three.js + GSAP motion with day/night theming in dependency-light vanilla JS; 55 KB initial bundle, screen-reader-safe animations, deployed on Vercel.

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place — NitroStack × MCP To The Moon Buildathon · 2026 Best Project — SRM Insider Community · Jun 2026
- 2nd Runner-Up — The Last Commit: Agentic AI Hackathon, Cherry+ Network · SRMIST · Apr 2026
- Top 12 Teams — Kernel Panic, DevFest On Campus, GDG SRM · Apr 2026
- Python Software Training — ENDURO · IIT Hyderabad · Oct 2025 (EN251770)

SKILLS

Languages JavaScript, Python, C, C++, Java

Frontend React, Next.js, Three.js, GSAP, Tailwind CSS, Vite

Backend FastAPI, Node.js, REST APIs, WebSockets

Databases PostgreSQL, Redis, ChromaDB

Cloud & DevOps AWS, Vercel, Render, Railway, Docker, CI/CD (GitHub Actions), Git

AI / ML LangChain, LangGraph, RAG, MCP, Groq Vision, Ollama, SHAP
